

Hello, everyone!

Cloud Computing & DevOps Series

- ↳ Basic
- ↳ Intermediate
- ↳ Advanced + AI

→ projects (fresher + Experienced)

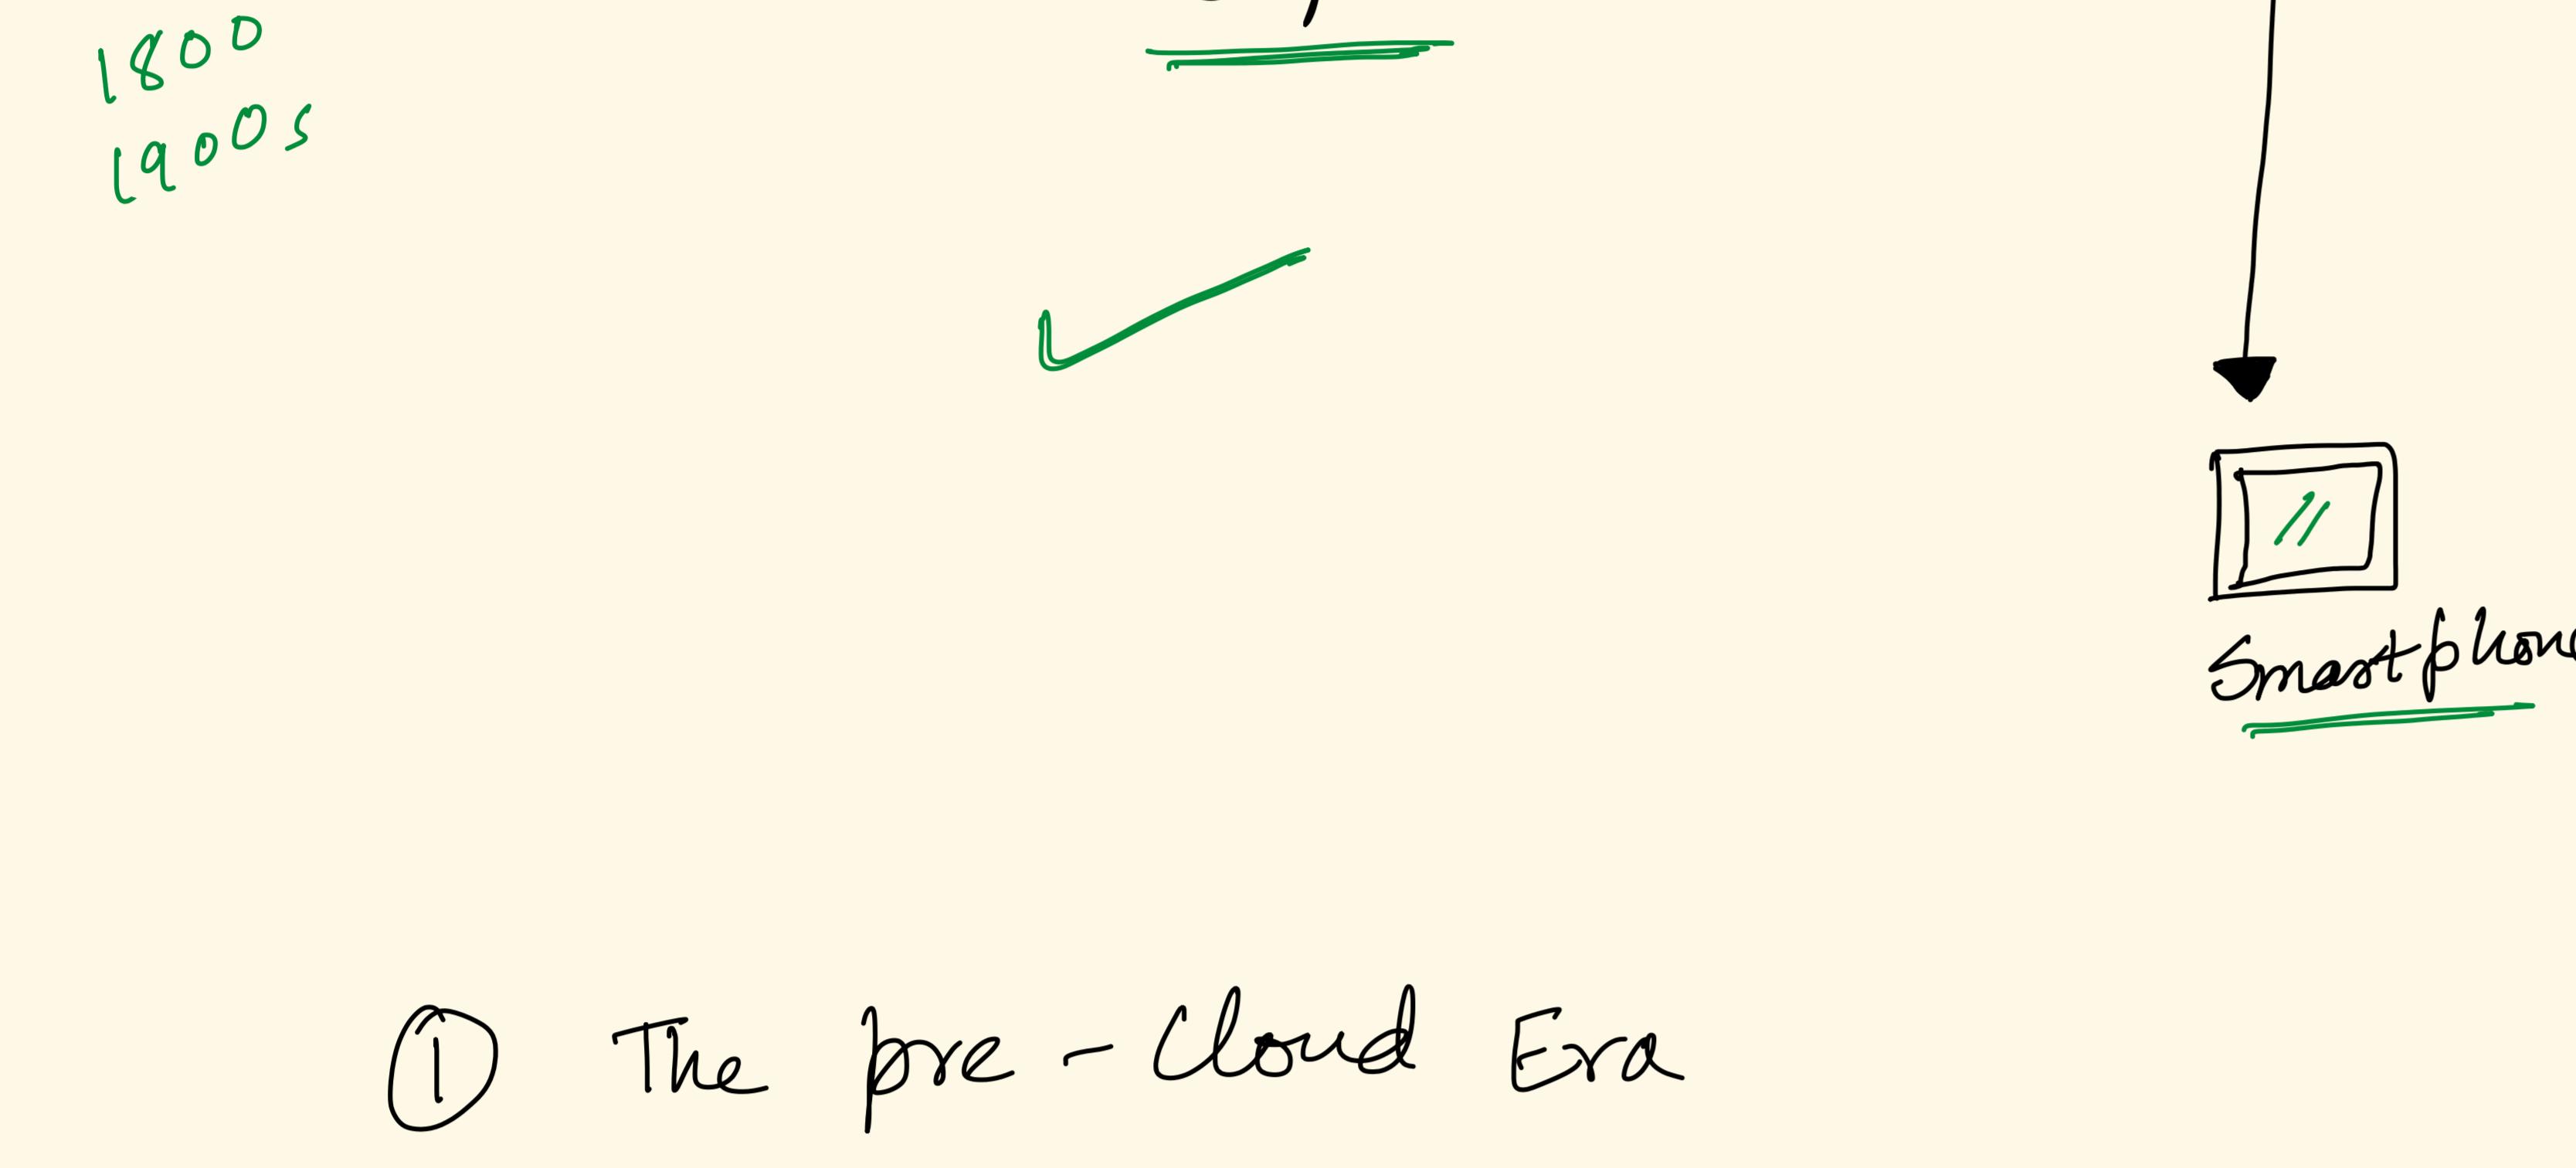

→ Azure / AWS / GCP

Duration → 60 days

Day - 01

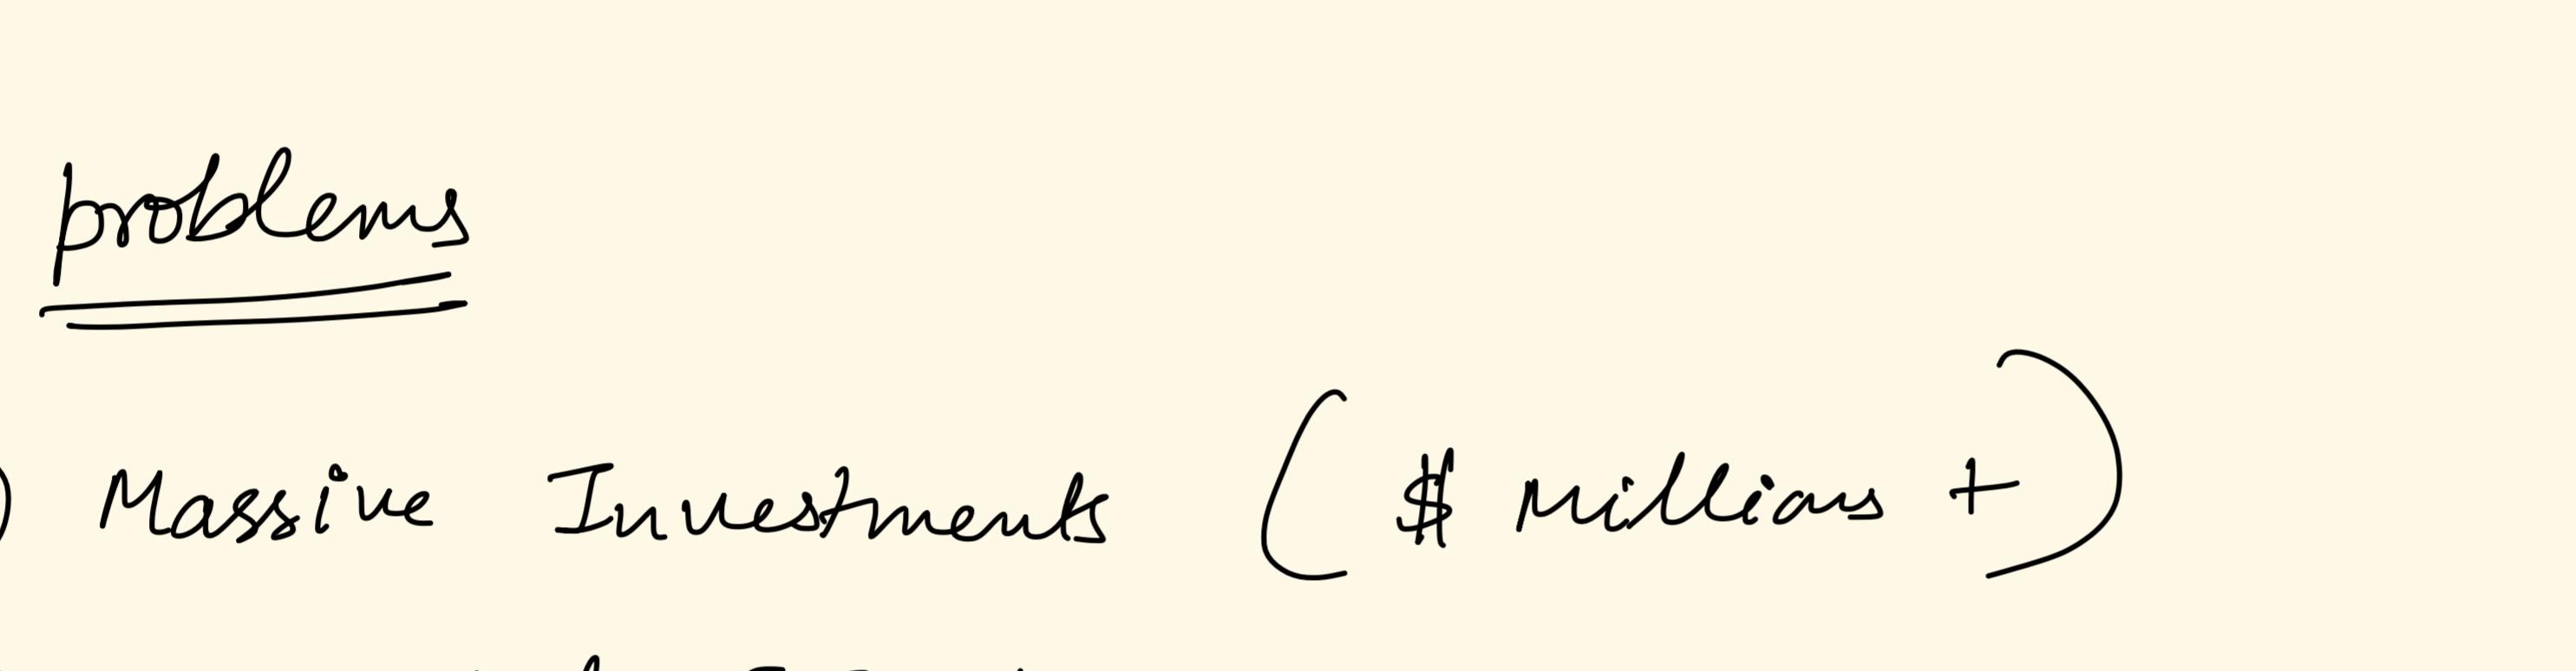

Cloud History - Before vs After

"quote" - To learn new technology,
look to its history,
understand its purpose, and
see the good it brings.

① The pre-Cloud Era

→ 1980 - 1990s

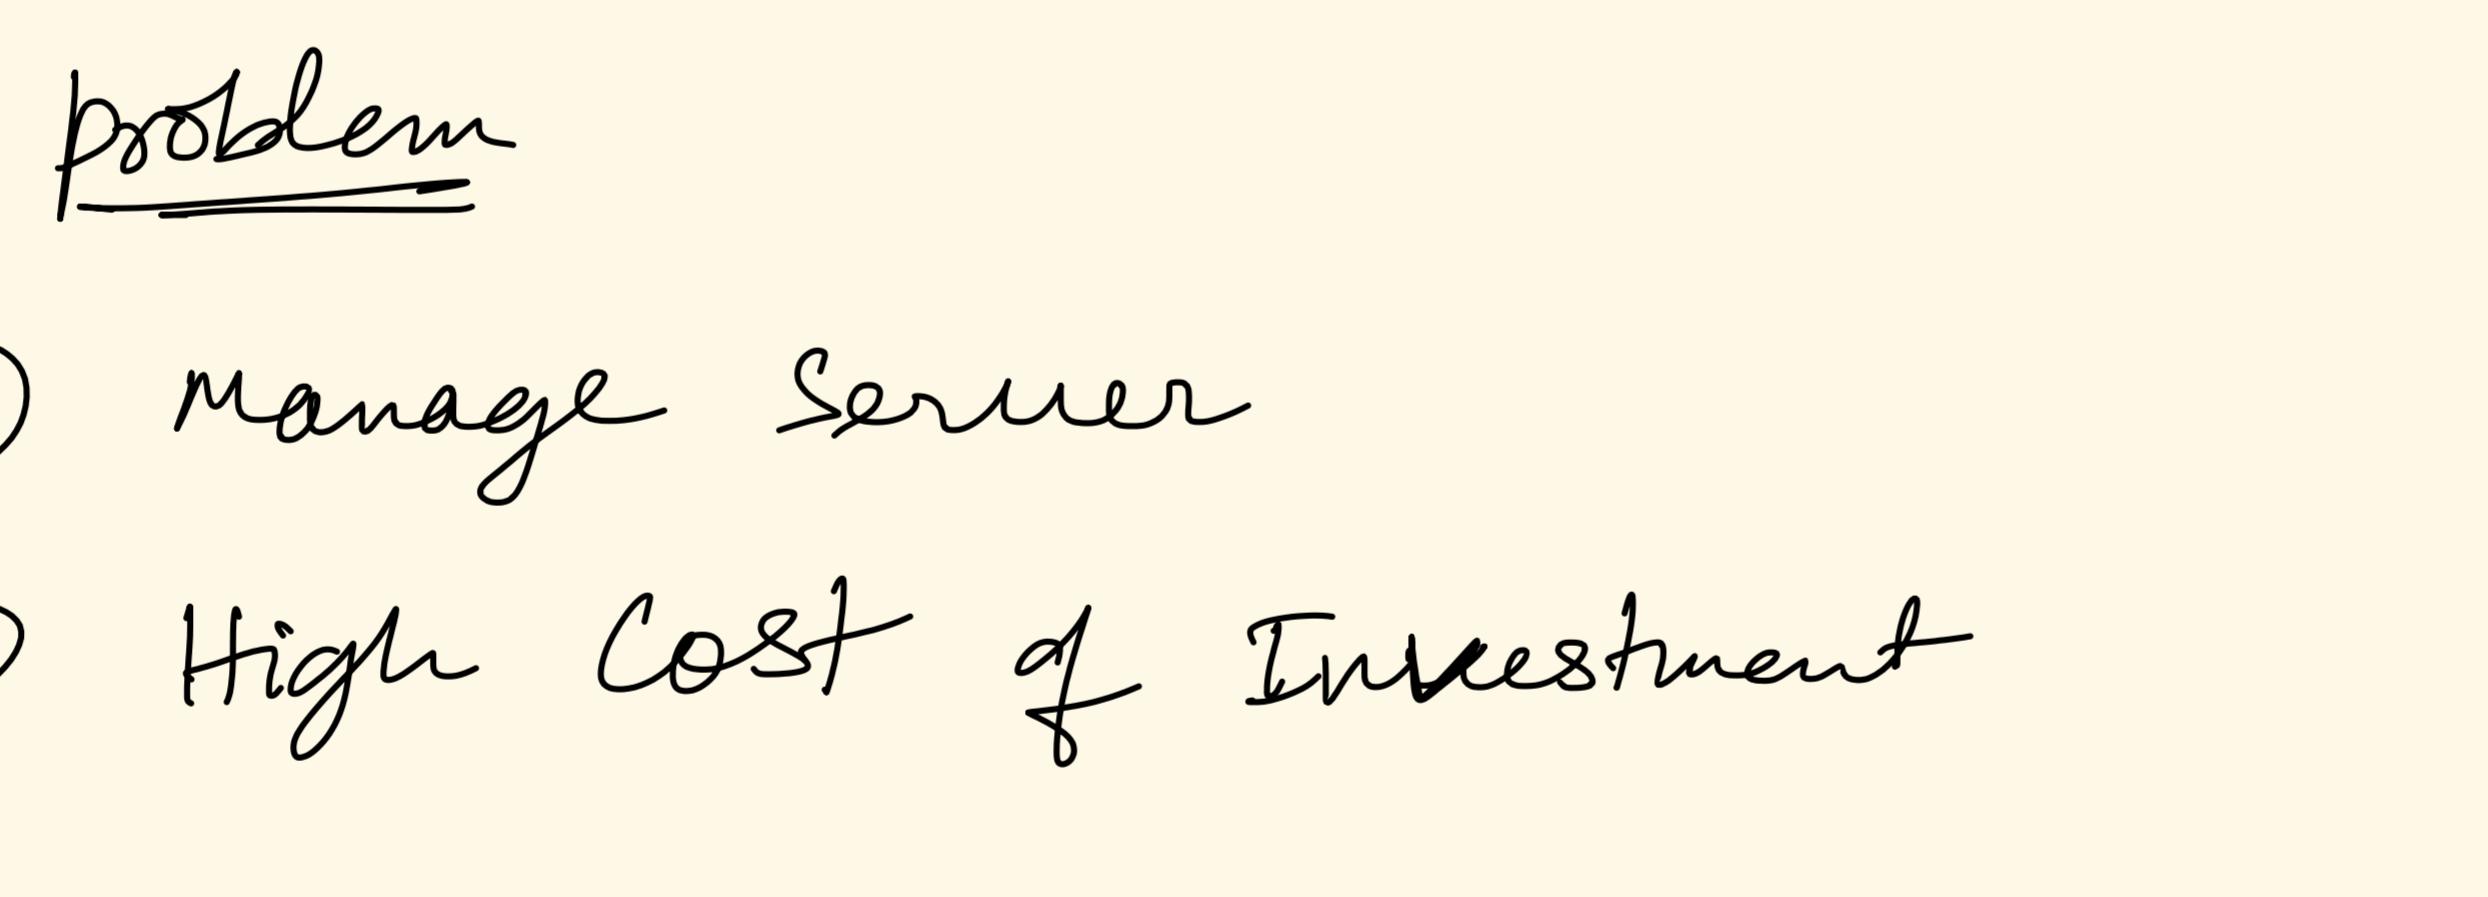

problems

- ① Massive Investments (\$ million +)
- ② Dedicated IT-team to manage these Servers
- ③ Scaling meant buying more hardware

② The Virtualization

1999, → (VMware) → Virtualization

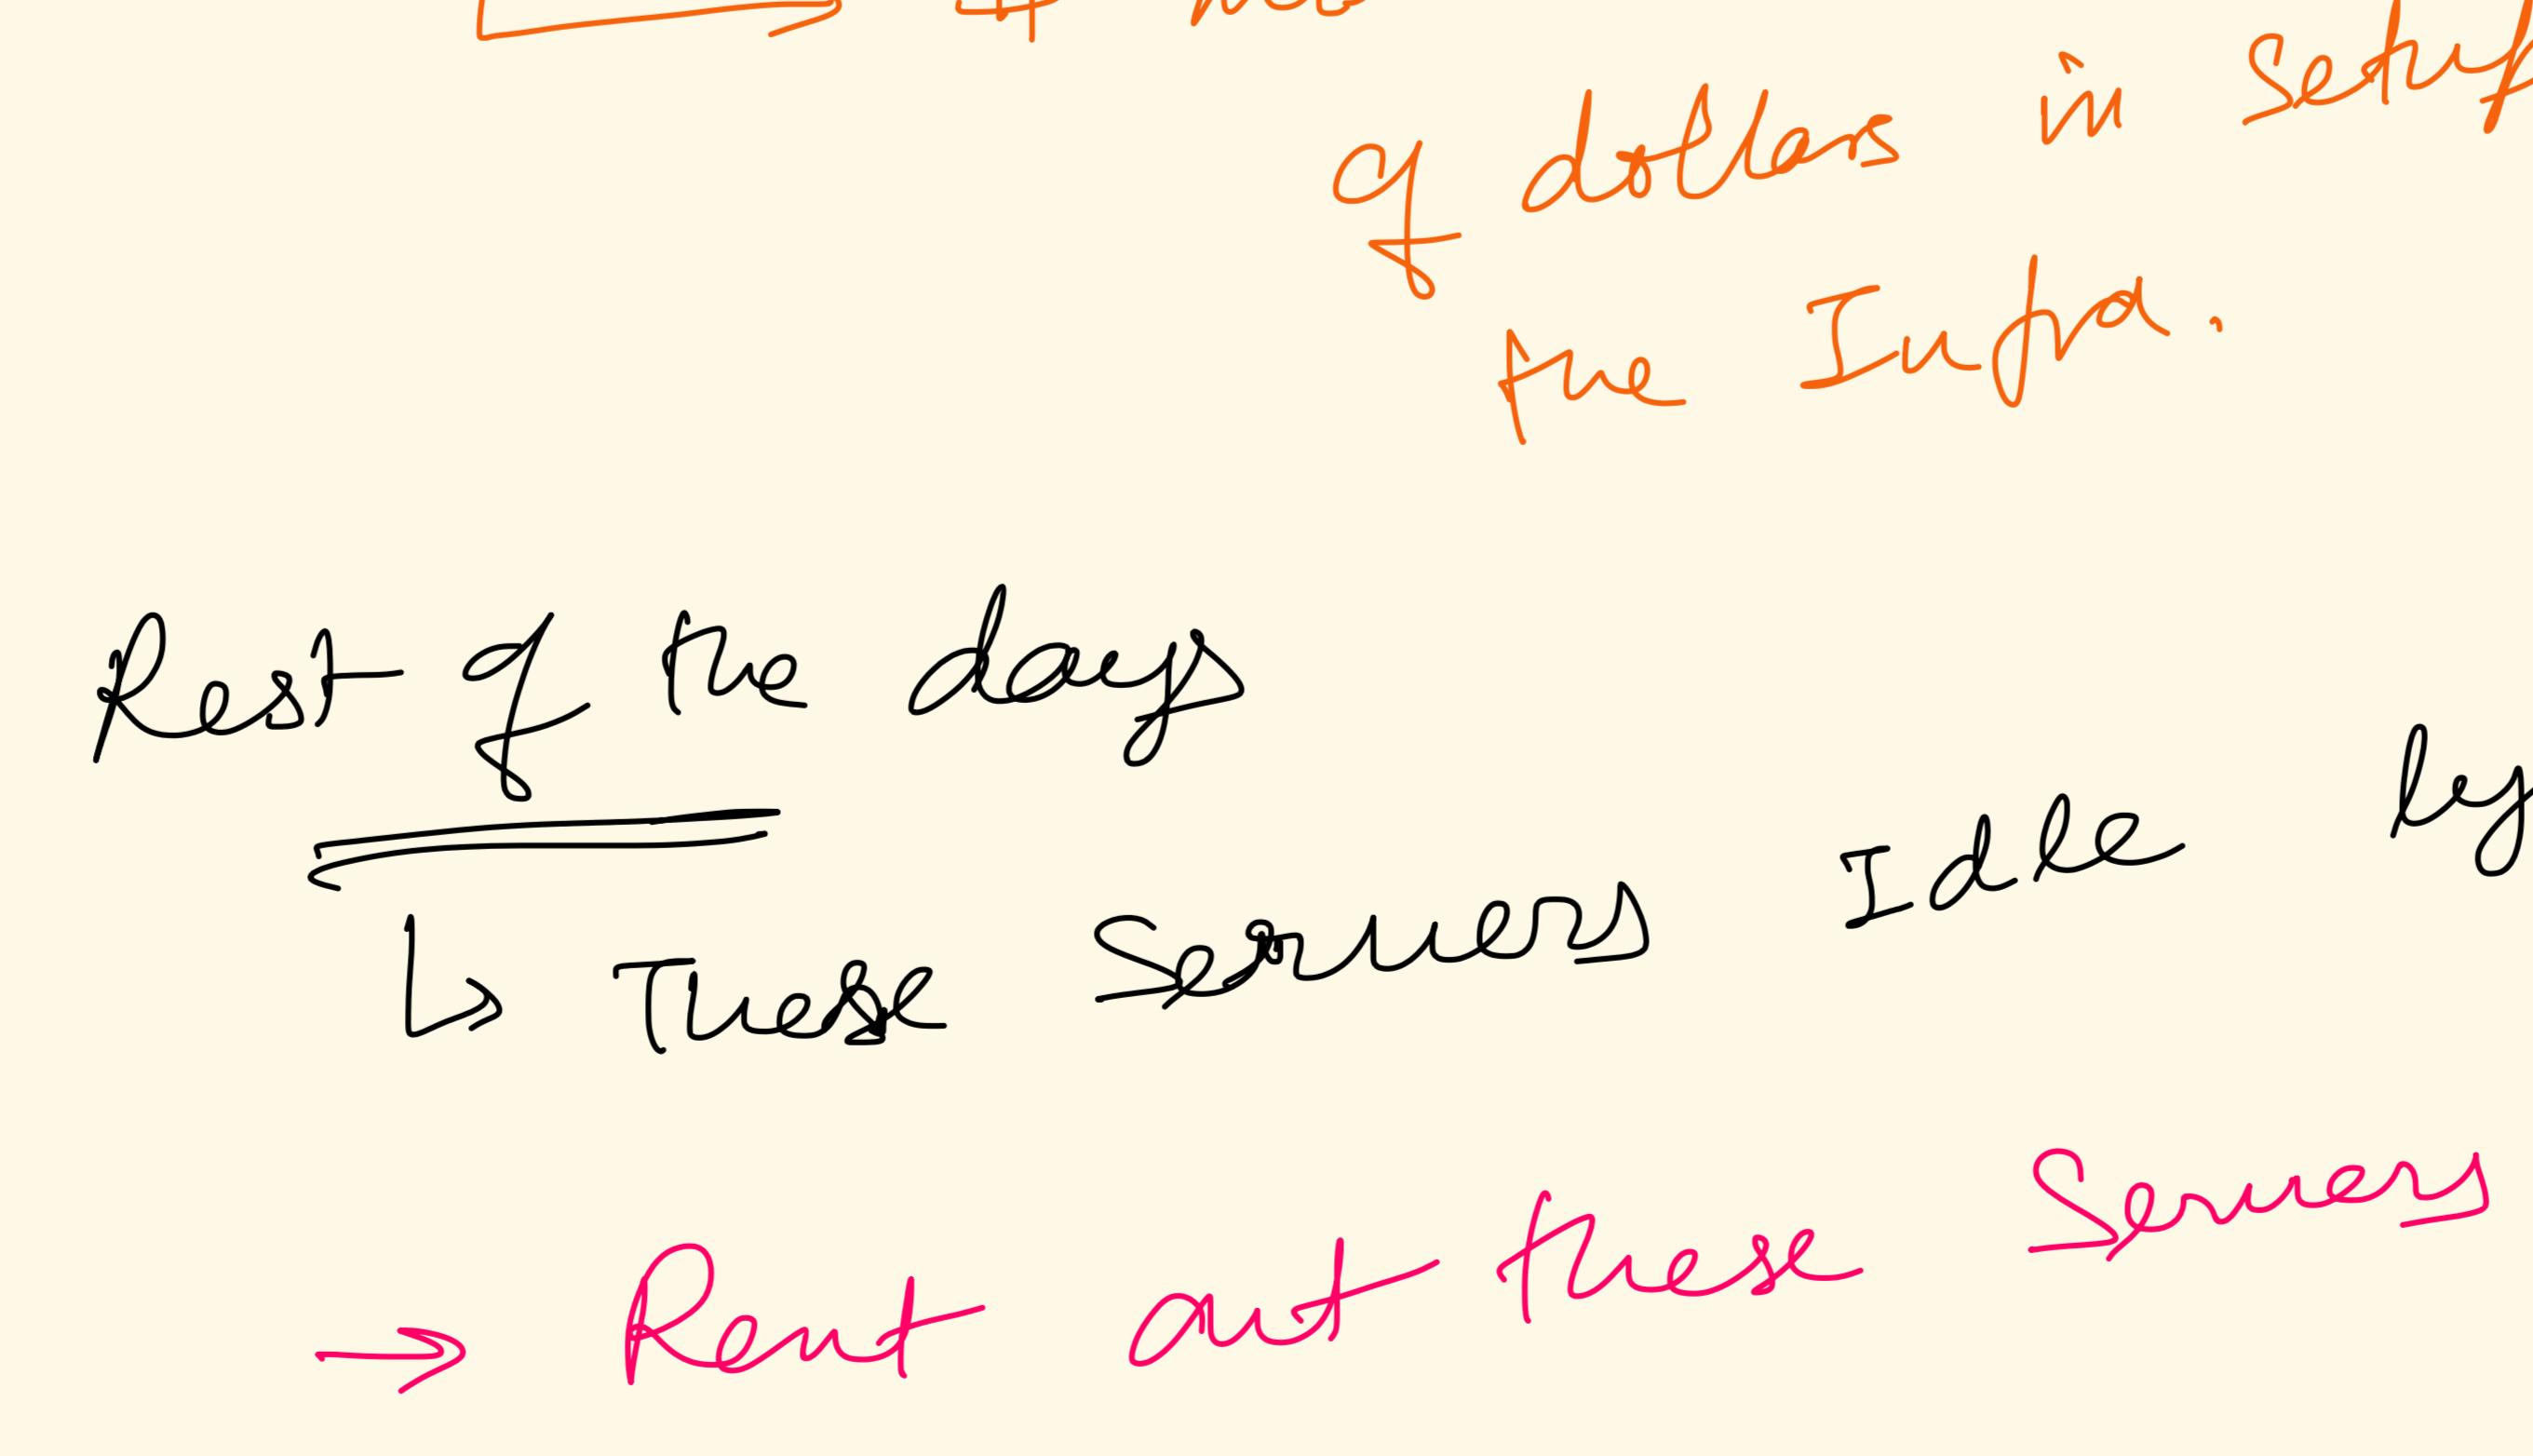

problem

- ① Manage Server
- ② High Cost of Investment

③ Cloud

Amazon

Rest of the days
↳ These Servers Idle lying

→ Rent out these Servers.

In, 2006 → AWS

④ google (2008)

↳ google App Engine

⑤ Microsoft (2009)

↳ Azure
